Professional Summary

Computer Science undergraduate specializing in AI & Machine Learning with a CGPA of **8.76/10**. Hands-on experience building full-stack applications, AI-enabled workflows, and data analytics platforms. Developed a bilingual Gemini-powered symptom-assessment assistant, an analytics platform processing **3.37M+ Aadhaar records**, and a deployed MERN reverse ride-hailing platform. Skilled in Java, Python, SQL, machine learning, REST APIs, and database-backed application development.

Education

Vellore Institute of Technology **Sep 2023 – Expected 2027**
B.Tech in Computer Science & Engineering (AI & ML Specialization) | ***CGPA: 8.76/10***

Projects

AI HealthBot – Bilingual Symptom Assessment Platform Live **Jan–Mar 2026**
Full-Stack AI Application | React, TypeScript, Node.js, Supabase Edge Functions, Gemini 2.5 Pro

- Built a bilingual (English/Hindi) symptom-assessment assistant using **Gemini 2.5 Pro**, a **9-step workflow**, contextual follow-up questions, and **3-level risk triage** (Low, Moderate, High).
- Designed structured prompts for symptom summaries and risk-based recommendations, including emergency guidance for high-risk inputs and clarification when symptom descriptions are vague.
- Integrated AI workflows through Supabase Edge Functions with PostgreSQL-backed health history, authentication, downloadable PDF reports, and an NGO analytics dashboard.

Aadhaar Insights – Data Analytics Platform Live **Jun–Jul 2026**
Data Analytics & Machine Learning | Python, Pandas, NumPy, Scikit-learn, Streamlit, Plotly, Power BI

- Analyzed **3.37M+ records** across **3 official UIDAI datasets** covering Aadhaar enrolment, demographic updates, and biometric updates using Python, Pandas, and NumPy.
- Built a **9-page Streamlit dashboard** and Power BI reports for KPI monitoring, regional comparisons, trend and correlation analysis, anomaly detection, and automated recommendations.
- Benchmarked Baseline (DummyRegressor), Linear Regression, and Random Forest across the three UIDAI datasets using MAE, RMSE, MAPE, and R^2; Random Forest achieved the highest R^2 on all three datasets.

Swayam Saarthi – Reverse Ride-Hailing Platform Live **Dec 2025–Jul 2026**
Full-Stack MERN Application | React, TypeScript, Node.js, Express.js, MongoDB, JWT, Socket.IO, Leaflet

- Built a reverse ride-hailing platform with **24 React page components**, **35+ REST API routes**, **7 Mongoose models**, and role-based portals for users, drivers, and administrators.
- Implemented a **5-state booking workflow** with JWT authentication and role-based access control, connecting ride operations with notifications, reviews, payment workflows, and ride updates.
- Integrated Socket.IO for real-time communication and Leaflet/OpenStreetMap for ride tracking; deployed the frontend on Vercel, backend on Render, and database on MongoDB Atlas.

Technical Skills

Languages	Java, Python, SQL
AI & ML	Machine Learning, Scikit-learn, NumPy, Pandas
Web Development	React.js, Node.js, TypeScript, REST APIs
Databases	MongoDB, MySQL, Supabase
Data Analytics	Power BI, Tableau, EDA, Streamlit
Developer Tools	Git, Google Colab

Certifications & Achievements

- **Oracle Cloud Infrastructure 2025 Certified Data Science Professional** — Oracle Credential
- **Oracle Agentic AI Foundations Associate (1Z0-1157-26)** — Oracle Credential
- **Applied Machine Learning in Python** — Certificate
- **TCS CodeVita Season 13 – Global Rank: 1206** — Rank Proof
- **Graph Camp – AlgoUniversity** — Certificate
